Amir Khushroo

Mumbai, India | (+91) 89697-44535 | amirkhushrootec@gmail.com | LinkedIn | GitHub

Profile

Computer Science & Engineering student specializing in **Data Science & Artificial Intelligence**, with hands-on experience in **Python**, **SQL**, data analysis, and **machine learning**. Skilled in working with real-world datasets across data preprocessing, exploratory data analysis, and building data-driven solutions using **Pandas**, **NumPy**, **MySQL**, and **MongoDB**. Strong analytical and problem-solving mindset, with growing interest in scalable data pipelines and modern data engineering and cloud technologies.

Projects

Bank Marketing Subscription Prediction — Individual Project (GitHub)
Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

- Developed a **Random Forest Classifier** in **Scikit-learn** to predict customer term-deposit subscriptions from bank marketing campaign data.
- Performed data cleaning, preprocessing, and **feature engineering** on categorical and numerical customer attributes to improve model input quality.
- Conducted **Exploratory Data Analysis (EDA)** using **Pandas** and **NumPy** to identify key behavioral and demographic patterns influencing subscription likelihood.
- Evaluated model performance using classification metrics, including accuracy, precision, recall, and **confusion matrix** analysis, to assess predictive reliability.
- Visualized feature importance and classification results with **Matplotlib** to translate model outputs into interpretable business insights.
- Strengthened understanding of customer behavior through data-driven analysis, supporting more targeted marketing decision-making.

AI-Powered Hospital Management System — Team Project (GitHub)
React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, JWT

- Developed a **role-based hospital management system** with dedicated Admin, Doctor, Patient, and Operator modules using **React.js**, **Node.js**, and **Express.js**.
- Owned the **Operator Module**, building end-to-end features for patient registration, appointment management, and medical report handling.
- Designed and implemented secure **REST APIs** with **JWT authentication** and **MongoDB** integration to manage patient records and appointment data.
- Built responsive, reusable **React.js** UI components to streamline operator workflows and reduce manual data-entry steps.
- Structured backend routes and **MongoDB** schemas to support role-based access across the Admin, Doctor, Patient, and Operator modules.
- Collaborated with a cross-functional team using **Git** and **GitHub** for version control, code review, and continuous integration of features.

Education

Integral University — **Lucknow, India**
B.Tech, Computer Science & Engineering (Data Science & Artificial Intelligence, in association with IBM) — *Aug 2023 – May 2027*

- CGPA: 8.7/10.0

Skills & Interests

Languages: Python, SQL, Java
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Power BI, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization
Machine Learning: Scikit-learn, Regression, Classification, Random Forest, Feature Engineering, Model Evaluation
Web Development: React.js, Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MySQL
Developer Tools: Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Postman
Cloud & AI Tools: Gemini API
Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)
Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability

Certifications

- **Data Science Tools** — IBM
- **Statistics 101** — IBM
- **Build Your Own Chatbot** — IBM
- **Data Visualization with Python** — IBM
- **Data Science 101** — IBM
- **Data Analytics** — Deloitte

Languages

English (Proficient) | **Hindi** (Native) | **Urdu** (Native)
